Spray-dried Hydrolyzed Protein (SPHSD)

The globally acclaimed, exquisite farmed salmon from Norway's pristine fjords is rich in natural proteins, vitamins, minerals, and antioxidants. Our spray-dried hydrolyzed protein is efficiently processed from fresh salmon raw materials into a sustainable marine ingredient within just six hours of harvesting. This rapid processing ensures a pure and consistently highly digestible protein product.

Suitable for use in

- **AQUACULTURE** |
Excellent nutrition for farmed fish. Increased protein digestibility compared to standard fish meals, promotes feed intake, supports gut health and increases mineral uptake.
- **AGRICULTURE**
An excellent supply of highly digestible protein for a developing animal.
- **PET FOOD**
A highly digestible protein source for pets.

Available for delivery

- **PREMIUM SPRAY-DRIED (SPHSD)**

Rich in high-quality proteins (amino acids), omega-3 (EPA, DHA), vitamin B12, niacin, vitamin A, vitamin D, selenium, calcium, phosphorus, magnesium, potassium, sodium and trace minerals.

nutrimar

SOURCED WITH SUSTAINABILITY IN MIND

The global population is rapidly increasing, driving up the demand for sufficient and healthier food, as well as products based on sustainable raw materials. The rugged Norwegian coast harbors valuable marine resources essential for both human and animal nutrition. We are committed to providing sustainable, circular alternatives that support health, nature, and a better future.
